

KS1 Animal Habitats

Session Description

This is a fun and kinaesthetic session designed to relate animal adaptations to the conditions in their habitats.

Pupils use their imagination to explore a variety of habitats, choosing props to suit each habitat depending on its conditions.

In these sensory explorations, they act out encounters with a variety of animals that live in the different habitats.

This session includes meeting a live animal and looking at animal artefacts.

Learning Objective

To identify a variety of animals in different habitats and know that they are suited to those habitats.

National Curriculum Links

SCIENCE

Year 1 Animals, including humans

- identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals

Year 2 Living things and their habitats

- identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other

- identify and name a range of plants and animals in their habitats, including micro-habitats
