

KS2 Wild Explorers - Whose poo?

In this classroom based activity the children will match the items found in animal poo, with the animal it belongs to, and as to whether they are a carnivore, herbivore and omnivore. The following page provides the answers for your reference.

Curriculum Links

SCIENCE

Year 3 Animals, including humans

- identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat

Year 4 Living things and their habitats

- recognise that living things can be grouped in a variety of ways

Whose poo? (Answer sheet)

(1)

omnivore

(2)

carnivore

(3)

herbivore

Whose poo?

Scientists drove around a reserve in Africa and found three different animal poos. Help them to match the items found in the poo to the animal you think produced it; then decide whether the animal is a carnivore, a herbivore or an omnivore. Write the number 1, 2 or 3 next to the pictures on the next page to match them to the poos below.

(1) The scientists found seeds and fur in this poo!

(2) The scientists found black and white fur in this poo!

(3) The scientists found dry grass in this poo!
