

## KS4 Threatened Species Trail

# Introduction

The Threatened Species Trail will take you around the zoo and allow you to discover more about some of the threats affecting animals and the conservation work that is being done to protect them.

The status of how threatened an animal or plant species is comes from the IUCN Red List of Threatened Species™. This list places species into categories based on the number of individuals left and the threats that they are facing. The most threatened category where there are still some animals left is 'Extinct in the Wild'. This means that you can only find these animals in places like Marwell Zoo and protected reserves as there are none left in the wild.

There are 8 trail signs for you to find around the zoo. You can use the map at the back of this pack to help you find them. They look like this:

## Southern white rhino - a threatened species

### Problems?

**Hunting**  
Rhinos are poached for their horns. The horn is used in traditional Asian medicine and for ornaments.

Poaching has increased dramatically over recent years due to new uses of rhino horn as a proposed cancer and hangover cure. It is also becoming a status symbol in some countries.

**Political instability**  
Civil unrest in some countries in southern Africa means that conservation measures can be very difficult and increasingly expensive to enforce.

### What is being done?

**Protected by law**  
White rhinos are protected by CITES, an international agreement signed by nearly every country in the world. CITES controls the trade in animals, plants and their products.

**Protected areas**  
Law enforcement has been effective in some areas due to the development of fenced sanctuaries and conservation areas.

**Monitoring**  
The management of rhino populations has been made more effective through close monitoring. This allows areas with high numbers of rhinos to be identified, so that some rhinos from these areas can be moved to increase populations elsewhere.

**Education**  
Rhino horn is made out of keratin – the same material as our hair and nails! No scientific evidence has been found to support the idea that rhino horn has any medicinal properties. Sharing this message through education is really important to reduce the demand for rhino horn.

## The mystery word

Collect a letter from each Threatened Species sign around the zoo and rearrange the letters to spell out our **mystery word**...

	C				S	T			
--	---	--	--	--	---	---	--	--	--

The status of how threatened an animal or plant species is comes from the IUCN Red List of Threatened Species™. You can find the status on this scale on the trail signs:

For each animal on the Threatened Species trail, tick what their current status is:

	LC	NT	VU	EN	CR	EW
Humboldt penguin	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Southern white rhino	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Amur leopard	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Grevy's zebra	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Cotton-top tamarin	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Scimitar-horned oryx	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Pygmy hippo	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Giant anteater	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

What can you do to help save threatened species?

Write your ideas in this box.

## 1. HUMBOLDT PENGUIN

a) i) What is being harvested in some places to make fertiliser?

ii) Why is this causing problems for Humboldt penguins?

b) What can you do or advise others to do to help Humboldt penguins?

## 2. SOUTHERN WHITE RHINO

a) Why are rhinos being poached for their horn?

b) What is rhino horn made out of?

## SOUTHERN WHITE RHINO CONTINUED...

- c) What message is it important to share through education to reduce the demand for rhino horn?

## 3. AMUR LEOPARD

- a) Why do Amur leopards sometimes visit deer farms looking for food?

- b) What is being done to reduce the number of leopards being hunted?

#### 4. GREVY'S ZEBRA

a) How are Grevy's zebra tracked in the wild?

b) Why is tracking the zebra important for Grevy's zebra conservation?

#### 4. SCIMITAR-HORNED ORYX

a) What is a studbook used for?

b) Which country was the last place scimitar-horned oryx could be found in the wild and why was the conservation work in this area disrupted?

## 5. COTTON-TOP TAMARIN

- a) What is threatening the last major stronghold for cotton-top tamarins?

## 7. PYGMY HIPPO

- a) Why is the legal protection for the conservation of pygmy hippos difficult to enforce?

**Well done** for completing the threatened species trail! Look out for more threatened species as you walk around the zoo.

## THREATENED SPECIES TRAIL CROSSWORD

Complete the crossword below by adding some threats animals can face in the wild.  
Use the icons on the signs to help you.

- 1 = Political instability  2 = Competition  3 = Habitat loss 
- 4 = Invasive species  5 = Hunting  6 = Overfishing 
- 7 = Small range  8 = Loss of prey  9 = Pet trade 

# Threatened Species Trail

1. Humboldt penguin
2. Southern white rhino
3. Amur leopard
4. Grevy's zebra
5. Cotton top tamarin
6. Scimitar-horned oryx
7. Pygmy hippo
