

KS2 Wild Explorers - Whose habitat?

Before looking for an animal, or for signs of it, it is important to know which habitat you might find that animal in. This classroom based activity is a worksheet for the children to fill out. They will name three different habitats, think of two words to describe each habitat, and then draw a line from each habitat to the animal they think lives there. The following page provides the answers for your reference.

Curriculum Links

SCIENCE

Lower Key Stage 2 Working scientifically

- making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers

Year 6 Evolution and inheritance

- identify how animals and plants are adapted to suit their environment in different ways and that adaption may lead to evolution
