The technical information provided in the studbook can easily be misread or misinterpreted unless properly analysed, as such WAZA and Marwell Wildlife strongly recommend that users of this information consult with the Studbook Keeper in all matters related to data analysis and interpretation, and for the most current data.

## Introduction

Welcome to the international studbook for Hartmann's mountain zebra 2023. The studbook includes updates until 31 March 2024 as they have been reported to me. The studbook provides you with a full overview of the living captive population, births, deaths and transfers during 2023.

If you are aware of any conservation projects for this species and would like them reported here, please get in touch with me.

**PLEASE, WOULD ALL INSTITUTIONS THAT ARE NOT REPORTING TO ZIMS ENTER THE PERMANENT STUDBOOK NUMBERS IN THEIR RECORDS TO MAKE COMMUNICATION ABOUT INDIVIDUAL ANIMALS EASIER.**

### Ex-situ Population:

The total number of Hartmann's mountain zebra (HMZ) kept *ex-situ* on 31<sup>st</sup> December 2023 was: 81.145.0 (226) in 59 institutions, in 15 countries.

32.65.0 (98) HMZ in 30 European institutions, spread over 11 countries.

3.3.0 (6) HMZ in 5 institutions in Asia

0.1.0 (1) HMZ in 1 institution in Central America

45.73.0 (118) HMZ in 22 institutions in North America,

1.3.0 (4) HMZ in 1 institution in South Africa

Annual births and deaths during the period of 1<sup>st</sup> Jan 2023 – 31<sup>st</sup> Dec 2023:

### 2023 globally:

Total births reported: 6.8.1 (15)

Total deaths reported: 4.8.1 (13)

### 2023 in Europe:

Births reported: 4.4.1 (9)

Deaths reported: 3.7.1 (11)

### 2023 in N.America:

Births reported: 2.4.0 (6)

Deaths reported: 1.1.0 (2)

The Species Survival Plan (SSP) in North America is looking for new holders to accommodate their growing population, in particular those willing to hold male groups. If you know of institutions that are interested in this species, please ask them to contact their regional coordinator.

### Population Management Programmes:

Three regions have coordinated breeding programmes: Europe (EEP), North America (SSP) and Japan. For contacts of the relevant coordinators please see Section *AIII*.

**Wild Population:** The IUCN completed the last Red List assessment for HMZ in 2018 and the Vulnerable status was retained (VU A3bcd) due to the probability of a future population reduction of at least 30% if further severe droughts occur. While the population has increased in recent years, HMZ remain at threat from another catastrophic drought as this would probably result in mortality across their range, but particularly of a high proportion of zebras on private farms and freehold conservancies. Gosling, L.M., Muntifering, J., Kolberg, H., Uiseb, K. & King, S.R.B. 2019. *Equus zebra ssp. hartmannae*. *The IUCN Red List of Threatened Species* 2019: e.T7958A45171819. <https://dx.doi.org/10.2305/IUCN.UK.2019-1.RLTS.T7958A45171819.en>. Accessed on 26 March 2024.

A big **Thank you!** to all institutions, curators, keepers and registrars, and the regional coordinators for their ongoing cooperation particularly in these difficult times.

TANYA LANGENHORST

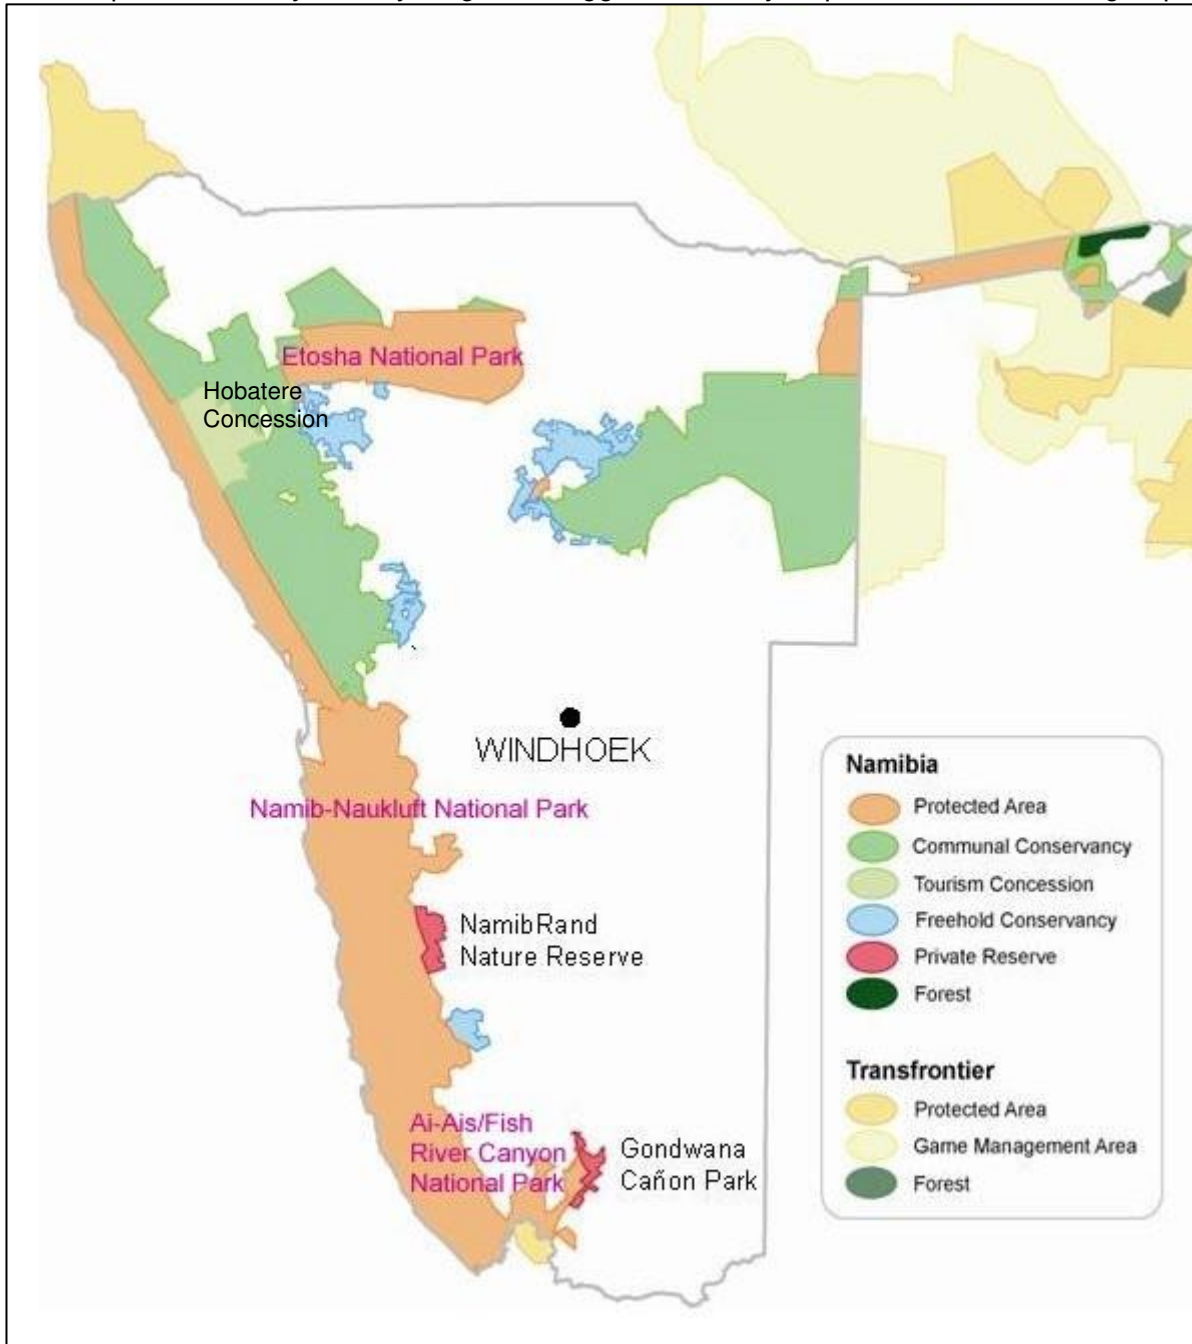

INTERNATIONAL STUDBOOK KEEPER & EEP COORDINATOR FOR HARTMANN'S MOUNTAIN ZEBRA

# Hartmann's Mountain Zebra Conservation & Research

## Conservation Research on Hartmann's mountain zebra, *Equus zebra hartmannae*, in Namibia.

Prof. L. M. Gosling, School of Natural and Environmental Sciences, Newcastle University, U.K. and Namibia Nature Foundation, Windhoek. Email: [l.m.gosling@ncl.ac.uk](mailto:l.m.gosling@ncl.ac.uk)

Prof. Gosling only gave me a very brief update on wild Hartmann's mountain zebra: While he can report large numbers of births over the last two years with good rains, the forecast is not so optimistic. The 23-24 rains are poor and many of the young will struggle when they disperse from their birth groups.

Map 01: Namibia protected areas and mountain zebra study sites

## Research on Hartmann's mountain zebra, *Equus zebra hartmannae* :

A veterinary nursing student from the University of Bristol is using studbook data to investigate "Changes in infant mortality and lifespan in the Hartmann's mountain zebra breeding Programme over time.

## Explanations

The studbook with a full historical listing will be published as pdf file only due to its size.

All animals registered in the studbook have been issued with a unique studbook number. Even if stillborn, animals will still be entered into the database as this is useful for reproductive and demographic analyses. I would urge all registrars to enter these numbers into their records.

The regularity of contact (or the lack of contact) with holding institutions, is constantly monitored. If no information has been given for a specimen for a considerable time and all efforts to receive information from an institution prove to be fruitless, this holder will be listed as "lost to follow up" and be removed from the studbook.

### Death & Post Mortem:

Some institutions still hold "passports" for some of their old animals. Upon the animal's death, please send the "passport" to the studbook keeper together with photos and a copy of the post mortem report.

### CNYN COLO:

Many of you will know that Canyon Colorado Equid Sanctuary in New Mexico (CNYN COLO), probably the largest *ex-situ* equid population in a single location, has moved all of their animals to new owners in 2006/7. Unfortunately, it was not possible for them to identify all animals individually (studbook number) and to inform the studbook holders which equid went where or the relationship between these animals. The animals that were recorded as living in CNYN COLO are now registered as lost-to-follow-up in the studbook.

The exception to this are those animals that were transferred from CNYN COLO to North American SSP institutions. These have now been issued with permanent studbook numbers as the SSP made assumptions on the relatedness of these Hartmann zebra.

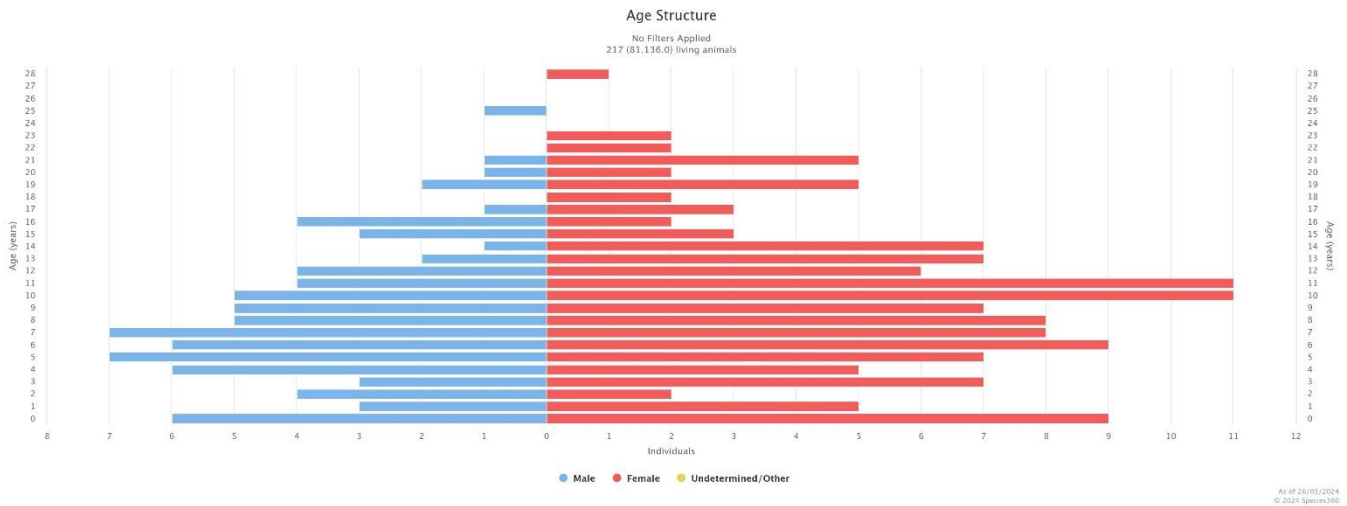

## Studbook Legend

Stud#:	Animal's permanent studbook number. Studbook numbers may not always be assigned chronologically, due to animals being recorded as they become known to the Studbook Keeper.
Sex:	M for male, m for castrated male, F for female, cont if contracepted, neut if neutered, U for unknown sex
Birth Date:	Animal's birth date. A tilde mark, '~', before a date indicates that it is approximate. '??' indicates that the date is unknown.
Sire and Dam:	Studbook numbers for the animal's sire and dam. 'UNK' if unknown. 'MULT' if several candidates have been identified. 'WILD' if the sire or dam was considered to be wildcaught - this animal is a founder.
Location:	The institution holding the animal at the time. If the animal is no longer traceable by the Studbook Keeper, 'ltf' (lost-to-followup) will appear to the right of the last known location.
Date:	The date on which the event occurred. A tilde mark, '~', before a date indicates that it is approximate. '??' indicates that the date is unknown.
Local ID:	The identification assigned by the specimen's location, often its SPECIES360 number, house number, or occasionally house name.
Event:	Capture, Birth, Transfer, Loan, Ownership change, Death or Release
Identifiers:	House Name, Transponder, Tag/Band, Tattoo, Notch

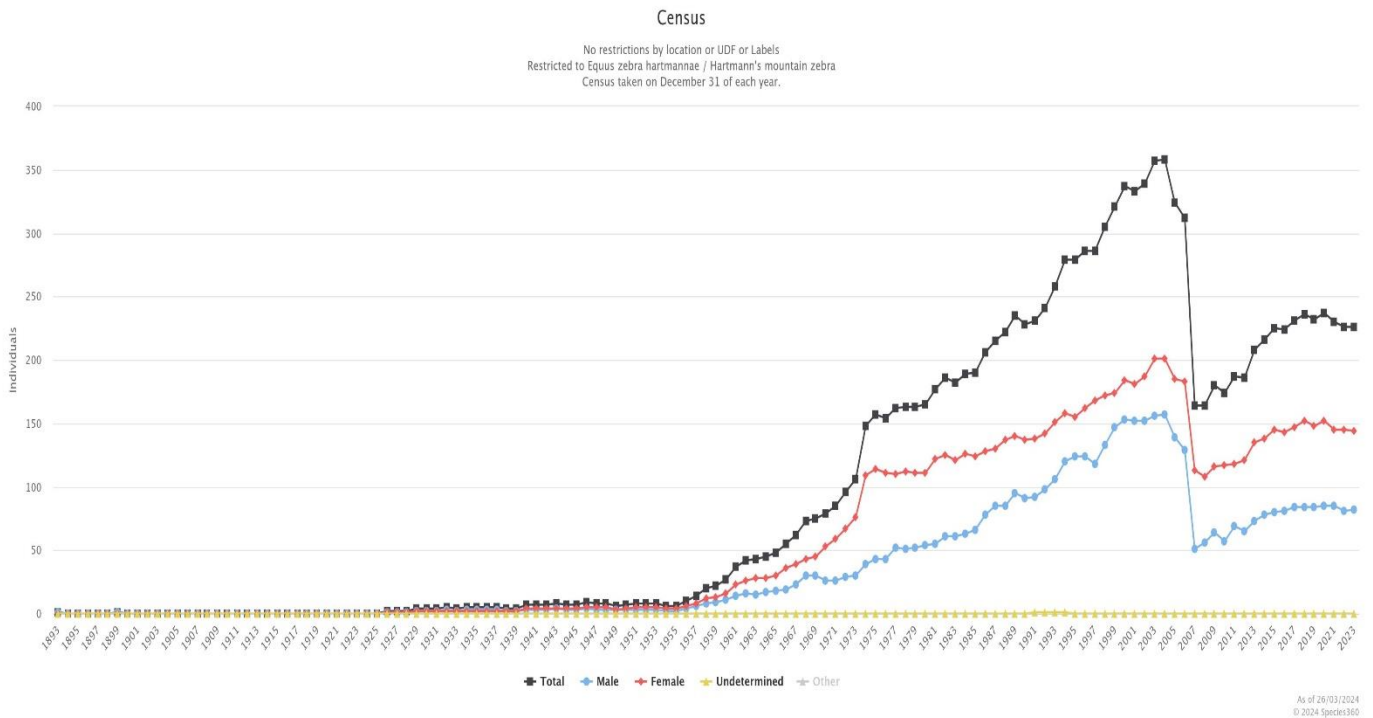

# **Age Pyramid & Census Report**

Global population

**Figure 4** Age Pyramid for the global population of HMZ studbook on the 26.03.2024

**Figure 5:** Global census report to end Dec 2023. The large drop in 2006 is the result of reporting all animals from Canon Colorado Equid Sanctuary as lost-to-follow up. The graph reflects only those animals that the studbook can monitor.
