

KS3 Conservation at Marwell

Session Description

This session focuses on the work of Marwell, providing an insight into how Marwell Wildlife is helping to conserve threatened species and their habitats both locally and globally. Students learn about the importance of collaboration in the monitoring of species worldwide, and together we give thought to the role of modern zoos in conservation efforts.

Learning Objective

To understand the importance of maintaining biodiversity and how our actions can have an impact.

To understand Marwell's role in the conservation of species and their habitats, locally and globally

National Curriculum Links

SCIENCE

Interactions and interdependencies

Relationships in an ecosystem

- how organisms affect, and are affected by, their environment.

Inheritance and evolution

- changes in the environment may leave individuals within a species, and some entire species, less well adapted to compete successfully and reproduce, which in turn may lead to extinction.

- the importance of maintaining biodiversity.
