

KS4 Observational Drawing

Session description

An opportunity to get up close to our collection of skulls and animal pelts (many on loan from HM Revenue and Customs).

This is a self-led session giving students the opportunity to use their medium of choice in a close study of our bio artifacts collection (art materials not supplied). A member of the Marwell team will be on hand to answer any questions

Students may then apply what they have learnt to the live species out in the zoo.

Learning Objectives

To develop a greater understanding of the form and pattern of some of the vertebrate species.

To engage with and interpret the bio artifacts provided.

National Curriculum Links

3.1 Knowledge and understanding

Show knowledge, understanding and skills in the development of their personal work informed by first-hand experiences and appropriate secondary sources

3.2 Skills

Demonstrate the ability to develop ideas through investigation informed by selecting and critically analysing sources.
